

Why Pasteurize?

Any Questions?

Visit www.why-pasteurize.com to find out why!

- ✚ Raw milk has sickened many thousands of people, killed mothers, their children and unborn babies.
- ✚ There are no federal food safety guidelines for raw milk because it is too risky to produce.
- ✚ Bacteria like E. coli from a cow can harm or kill you.
- ✚ Most farmers insist on pasteurizing their milk.

Pasteurization is necessary *Don't Drink Raw Milk!*
